

Elevating Training and Media Production with Q-SYS

# Fortec Medical

## Realizing a Vision of Enhanced Training and Media

 Hudson, Ohio

Fortec Medical, a leader in mobile surgical technology, serves healthcare providers across the United States with cutting-edge equipment and training. As part of their mission to deliver exceptional service, Fortec Medical sought to enhance their training and media production capabilities at their Hudson, Ohio headquarters. To achieve this, they partnered with MediaNet AV to design and install a comprehensive media studio and training center powered by the Q-SYS ecosystem.

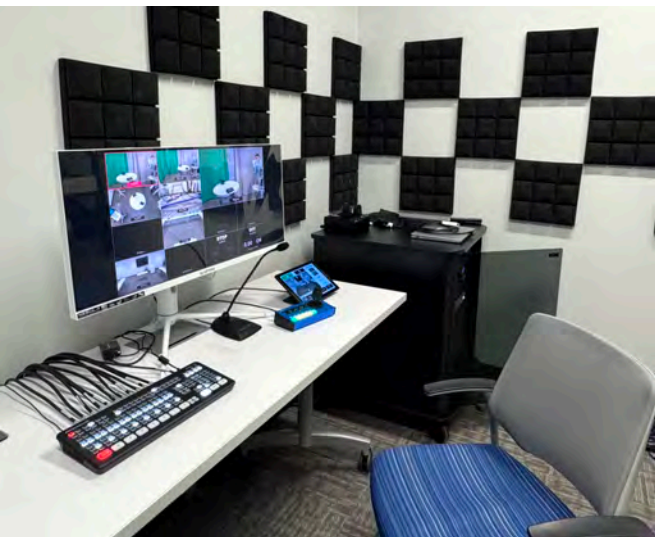

An aerial photograph of the Fortec Medical building, showing its full footprint and surrounding area. The building is a large, rectangular structure with a flat roof covered in solar panels. It has a mix of light blue and white siding. There are several parking spaces in front of the building, and some trees and landscaping around the perimeter.

**“MediaNet AV has allowed us to create a one-stop shop media room to fit all of our multi-faceted needs. They took full control of the process and met every one of our ever-evolving needs and requests.”**

**— Derek, Fortec Medical**

# Media Studio

The Media Studio was designed to meet Fortec Medical's need for high-quality video production and live-streaming, addressing the challenge of creating professional content in-house. MediaNet AV equipped the space with advanced technology to ensure flexibility and ease of use:

# Training Center

The Training Center addresses the challenge of delivering effective, streamlined training for Fortec Medical staff through MediaNet AV's custom conferencing and content-sharing solution:

The redesigned Training Center eliminates technology barriers while maximizing engagement for Fortec Medical staff. Presenters move freely with automatic camera tracking and clear voice capture throughout the space. The suspended monitor ensures everyone stays connected to content without losing engagement with the presenter.

Trainers can instantly connect devices and manage all room technology through a single intuitive interface, eliminating setup delays. Hybrid sessions provide remote participants the same quality experience as those physically present through smart cameras and superior audio clarity.

This integrated environment supports Fortec Medical's commitment to effective staff development by making technology enhance rather than hinder the learning process.

## Results & Benefits

The Q-SYS-powered Media Studio and Training Center transformed Fortec Medical's operations by ending the daily hassle of setting up and dismantling equipment. Staff now rely on a versatile, all-in-one solution that's always ready, streamlining training and media production.

The multi-camera setup captures essential technology angles, while centralized Q-SYS control simplifies use, saving time. This efficient system, delivered with MediaNet AV, supports Fortec Medical's workflows and mission to enhance healthcare through technology and training.

Since 2010, MediaNet AV has excelled in audio, video, and lighting solutions for churches, schools, and businesses. We design custom, intuitive systems and provide comprehensive training for seamless operation. Our innovative, client-focused approach ensures every project aligns with your goals.
